ALILEMON

ACIDIFYING BACTERICIDAL

TIPE OF PRODUCT: ACIDIFYING BACTERICIDAL

SUITABLE FOR: COWS / PIGS / POULTRY / PETS

DESCRIPTION

Acidifying antibacterial powder color Brown, not hygroscopic applicable in food for piglets pre and post weaned pigs growing, lactating sows, poultry and rabbits.

COMPOSITION

Ammonium formate, acetic acid, ammonium propionate.

INDICATIONS

Alilemon is indicated as bactericide in food control and regulator of intestinal pathogens. To reduce the incidence of diarrhoea and reduce buffer capacity of food.

ACTION

Not ionized organic acids have the ability to penetrate the pathogenic bacteria (coliform, Clostridium, Salmonella and Listeria spp.) and alter their normal physiology producing an osmotic, pH and energy imbalance that ends with his death; thus stimulating the development of beneficial flora by competitive exclusion.
