ALISALM

ANTISALMONELLA

TIPE OF PRODUCT: QUALITY AND PRESERVATION OF FOOD AND RAW MATERIALS

SUITABLE FOR: COWS / PIGS / POULTRY / HORSES / PETS

DESCRIPTION

Association of organic acids and formaldehyde in a watery excipient who possesses a high bactericide power.

COMPOSITION

Formaldehyde, formic acid, propionic acid.

INDICATIONS

It prevents the proliferation of Salmonella spp. and other gram-negative bacteria as Pasteurella spp., e. Coli, Klebsiella spp., Enterobacter spp., Proteus spp. and Pseudomonas spp., when it is added in feed and flour of animal and vegetable origin.

Alisalm is also indicated for the hygiene and disinfection of the circuits of the feed and rendering plants.

ACTION

Alisalm inhibits the potential enteropathogens reducing to the minimum the risk of food contamination, that pass through the cell wall of the enterobacteria, causes a metabolic disturbance within the cell lethal and irreversible.
