

HICELL

INACTIVE DRY YEAST

TIPE OF PRODUCT: PREBIOTICS

SUITABLE FOR: PIGS / PETS

DESCRIPTION

Inactive dry yeast obtained from the fermentation of a strain of *Saccharomyces cerevisiae*, specially selected to be used in the animal feed industry. Fine, dry powder spray dryer, good fluidity, beige coloring and excellent palatability. Its production process gives to the product a high digestibility of protein and an excellent amino acid profile. It contains minerals and dietary fiber. HiCell is a 100% natural product and not genetically modified.

COMPOSITION

Protein (N X 6.25) %	Min. 40.0
Humidity (105±2 ° C) %	Max. 8.0
Ash %	Max. 10.0
Density g/l...	Min. 420
pH	5.0-7.0
Calculated % carbohydrates	35 55
Crude fibre (%)	Max. 3.0
FAT % (Ethereal extract)	0.2 - 5.0

Energy (Kcal/Kg)	3,700
NNP (%)	3.5 - 3.8

INDICATIONS

HiCell is recommended as a source of protein and natural amino acids and high digestibility. Improves palatability.

ACTION

Nutritious source with contributions from protein and amino acids of high digestibility, vitamins and minerals. Source rich in glutamic acid (5% of aa total), stimulating amino acid in the protein synthesis and muscle synthesis of antioxidant precursors (glutathione) and active metabolites for bowel and brain use.

DOSE

- Swine 0.5 to 2%
- Birds 0.5 to 1 %
- Petfood 2 %
