HUG

SECANT, SANITIZER AND HEALING

TIPE OF PRODUCT: SECANT, SANITIZER AND HEALING

SUITABLE FOR: PIGS / POULTRY

DESCRIPTION

Hug is a desiccant dust, and absorbent natural healing. Its innovative formula contains no dioxins, phosphates, or ingredients that could harm the animal and the environment.

COMPOSITION

Fossilized natural seaweed (Lithothamnium calcareum). Mineral desiccants. Essences.

INDICATIONS AND ACTION

Hug protects piglets in the first days of life they are exposed to cooling, as it acts as an insulating layer - heat, preventing the loss of energy and vitality that allow the colostrum immediately. Hug acts as a powerful antiseptic and healing wounds cord and the integument, decreasing the incidence of omphalophlebitis and polyarthritis.

Hug reduces neonatal diarrhea when consumed inadvertently in contact with the breast of the sow, to function as a liquid absorbent and adsorbent of mycotoxins in the gut.

Hug significantly reduces the evaporation of ammonia and other toxic gases to the environment, thus generating a more comfortable environment for the animals and staff.

Hug functions as a repellent and insecticide. Produces a significant decrease of the insects of the farm as it has the property of penetrating the outer layer, and cause death by drying and dehydration.
