

SINTOX PLUS

MYCOTOXIN ADSORBENTS

TIPE OF PRODUCT: MYCOTOXIN ADSORBENTS

SUITABLE FOR: COWS / PIGS / POULTRY / HORSES / PETS

DESCRIPTION

Mixture of natural minerals of high purity synergistically enhanced, enriched with Mananoligosacáridos (MOS) and β -glucans which exert a specific action such as mycotoxins adsorbent; fundamentally aflatoxin, T-2 toxin, Deoxinivalenol (DON), Zearalenona and Ochratoxin.

It has free-flowing property that favour processes of mixing and pelleteado.

COMPOSITION

Silicon dioxide, aluminum oxide, iron oxide, calcium oxide, magnesium oxide, sodium oxide, potassium oxide, Mananoligosacáridos (MOS) and β -glucans.

INDICATIONS

Sintox Plus can be used in food and rations for all kinds of animals (poultry, cattle for meat and milk, pigs, horses, rabbits, etc.) in any of their ages and physiological States, that it lacks phosphorus, dioxins and heavy metals.

ACTION

The addition of Mananoligosacáridos (MOS) - extracted from the cell wall of strains of Yeast *Saccharomyces cerevisiae* selected - increase the power of adsorption (very harmful in sows) Zearalenona and Ochratoxinas.

Beta glucans act as immunostimulants to interfacing with the defence cells such as macrophages, granulocytes and cells natural killers, so release more amount of antimicrobial substance.

DOSE

- In food of pre-starter and initiation: 2 - 3 kg/tn (birds, pigs, rabbits, horses)
- In termination food: 1.5 - 2.5 kg/tn (birds, pigs, rabbits, horses)
- In cows of tambo and Feed Lot: 15-20 grams animal/day.
- Consulted the acting professional in high pollution levels.

PRESENTATION

Paper and polypropylene bags of 25 kg.
